Procedures and Findings

We have performed the procedures described below, which were agreed upon with the Company in connection with the inventory count of silver, gold, platinum and palladium bars and coins stored at The Safe House SG Pte. Ltd. located at No. 6 Changi South Street 3, Singapore 486128; and nickel and cobalt drums and bags stored at C. Steinweg Warehousing (F.E.) Pte. Ltd. located at No. 28 Jurong Port Road, Singapore 619113, respectively, as listed in the Schedule.

The procedures performed are summarised below:

1. For a random sample of at least 10% of total parcels of gold, platinum and palladium bars and coins listed in the Schedule, check that these parcels are stored in a UL Class 2 Lightweight Modular, individually sealed in uniquely identifiable level 4 tamper evident parcel bags and kept in Class II safe deposit boxes locked with unique mechanical keys and labelled with unique alphanumeric identifiers. For gold bars weighting 1 kilogram ("kg") or above, and silver bars weighing 5 kg or above, they may not be sealed in tamper evident parcel bags;
2. For a random sample of at least 10% of the total parcels of silver bars and coins listed in the Schedule, check that these parcels are stored in a vault equipped with Strong Room Door and placed in heavy-duty pallet wire cages. For certain selected silver bars that are weighing at 15 kg as well as LBMA Good Delivery Bars, they may not be stored in the heavy-duty pallet wire cages and are instead stacked on pallets within the vault equipped with Strong Room Door;
3. For a random sample of at least 10% of the total parcels of silver, gold, platinum and palladium bars and coins listed in the Schedule, check that all containers used to keep gold, platinum and palladium parcels are numbered and secured with a lock key, and that all containers and cages used to keep silver parcels are sealed with alphanumeric wire seals;
4. For a random sample of at least 10% of the total parcels of silver, gold, platinum and palladium bars and coins listed in the Schedule, trace the Parcel Identification Number ("Parcel ID") of each parcel to the Parcel ID of each individually sealed tamper evidence parcel bag of silver, gold, platinum and palladium bars and coins kept in the respective safe deposit boxes and cage tags;
5. For all nickel and cobalt drums and bags as listed in the Schedule, trace the Parcel ID listed in the Schedule to the Parcel ID marked on each drum and/or bag; and
6. For a random sample of 200 parcels of silver, gold, platinum and palladium bars and coins and a random sample of 10 parcels of nickel, cobalt drums and bags listed in the Schedule, weigh each selected sample and check that the weight is not less than the weight as shown in the Schedule for each selected sample.

Our procedures in relation to nickel and cobalt drums and bags stored were performed on 20 December 2024; and silver, gold, platinum and palladium bars and coins were performed on 31 December 2024, respectively. Where required, inventory roll-forward procedures were performed to ensure that the count remains appropriate as at 31 December 2024.

We found no exceptions from performing the procedures mentioned in points 1 to 6 above.
